Annex I Habitat types						Site assessment			
Code	PF	NP	Cover [ha]	Cave [number]	Data quality	A B C D	A B C		
						Representativity	Relative Surface	Conservation	Global
1110			41.07		M	B	C	B	B
1120			430.8		M	B	C	C	B
1170			26.27		P	B	C	B	B

- PF:** for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.
- NP:** in case that a habitat type no longer exists in the site enter: x (optional)
- Cover:** decimal values can be entered
- Caves:** for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.
- Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species					Population in the site						Site assessment			
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D. qual.	A B C D	A B C

- Group:** A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles
- S:** in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes
- NP:** in case that a species is no longer present in the site enter: x (optional)
- Type:** p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)
- Unit:** i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))
- Abundance categories (Cat.):** C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information
- Data quality:** G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Other Site Characteristics

La prateria di Posidonia mostra nella porzione di ponente del sito ampi segni di degrado; a levante si trova ancora in buone condizioni, spesso intervallata da formazioni di Coralligeno su substrato roccioso sub-orizzontale.

4.2 Quality and importance

L'interesse del sito deriva dalla presenza di prateria a Posidonia, in parte localizzate su roccia ed in parte su "matte", e di formazioni tipo coralligeno, habitat di interesse prioritario ai sensi della 92/43 CEE o proposti come tali dalla Regione Liguria. I contatti tra la prateria a Posidonia e le formazioni rocciose e coralligene aumentano considerevolmente il livello di biodiversità. Esemplari della specie Caretta caretta sono stati ritrovati al largo del sito. Esemplari delle specie pelagiche Caretta caretta e Tursiops truncatus sono stati avvistati occasionalmente entro i limiti del sito
